

Illinois MTSS Network

Building a system of supports that works.

What would it take to get learning growth for every student, every year, in your school?

WHAT IS MTSS?

Multi-tiered system of supports:

- Focuses on the whole child.
- Identifies struggles early and intervenes quickly.
- Supports academic, social emotional and behavioral growth.
- Takes a systems approach for consistency across schools and classrooms.

WHO ARE WE?

- Experienced professionals from across Illinois who have been supporting Pre-K to 12 educators for 15 years.

WHAT DO WE OFFER?

- Contextualized professional learning and coaching that supports sustainability.
- Virtual and in-person professional development.
- Free online resources.
- Program support to develop an MTSS framework for the whole child.

OUR RESULTS SPEAK FOR THEMSELVES.

Our professional learning and coaching has increased outcomes in:

- Fidelity of evidence-based practice implementation: 47% to 81%.
- Data-based decision making: 24% to 91%.
- Use of evidence-based assessment: 69% to 95%.
- Whole child, content area implementation outcomes across five years, with reading improving 46%, math improving 44% and behavior improving 39%.

“IL MTSS Network has been integral in the development and continuation of a solid MTSS implementation in our district. We started working with IL MTSS Network in 2017 as a way to increase our capacity to provide support via interventions to our students. Since that time they have assisted us in developing a more comprehensive program that includes academic intervention, social-emotional intervention, and attendance intervention.”

— **John F. Thomas**, Former Superintendent of Harvey School District 152
